Career Objective

Computer Engineering student passionate about Data Science, Machine Learning, and Artificial Intelligence. Experienced in working with data, extracting insights, and developing machine learning solutions for real-world problems. Skilled in Python, data analysis, and ML concepts with the goal of contributing to innovative data-driven solutions.

Education

B.E Computer Engineering (Pursuing) Jagadambha College Of Engineering & Technology, Yavatmal 4th Year - 7th Semester	2023 – 2027
Higher Secondary Certificate (HSC) Percentage: 61%	2021 – 2023
Secondary School Certificate (SSC) Percentage: 85%	2020 – 2021

Technical Skills

Programming: C, Java, Python, SQL
Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn
Tools: Power BI, VS Code, Git, GitHub, MS Office, Excel, Jupyter Notebook, Google Colab
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Web Technologies: HTML, CSS, Flask
Cloud: Google Cloud
Other: EDA, Data Cleaning, Data Visualization, Model Evaluation, Feature Engineering, Prompt Engineering, Generative AI

Projects

Bike-Sharing Demand Predictor

- Developed a machine learning prediction system to estimate bike rental demand using temperature, humidity, weather conditions, season, and time.
- Performed data preprocessing, categorical feature encoding, and exploratory data analysis.
- Built Linear Regression models to forecast demand and optimize bike availability.
- Technologies: Python, Flask, Pandas, NumPy, Scikit-Learn, HTML, CSS, Machine Learning.
- Live Demo: Bike Predictor
- Source Code: GitHub

Employee Attrition Predictor

- Developed a machine learning classification system to predict employee attrition based on job role, salary, overtime, and work experience.
- Cleaned data, handled missing values, encoded categorical variables, and prepared features for model training.
- Applied ML classification models to identify attrition patterns and support HR decisions.
- Technologies: Python, Flask, Pandas, NumPy, Scikit-Learn, HTML, CSS.
- Live Demo: Employee Predictor
- Source Code: GitHub

AI-Based Programming Language Roadmap Generator

- Developed a Generative AI application that creates personalized programming learning paths.
- Integrated Google Gemini API with Flask application for AI-powered roadmap generation.
- Applied prompt engineering techniques to improve AI-generated responses.
- Technologies: Flask, Python, Gemini API, Generative AI, Prompt Engineering.
- Live Demo: Roadmap Generator
- Source Code: GitHub

Internship

Data Science Intern

6 Months

Adhayan IT Training & Placement, Pune

- Worked on Data Science, Machine Learning, EDA, feature engineering, and visualization.
- Built predictive models using Pandas, NumPy, Scikit-Learn, Matplotlib, and Seaborn.

Web Development Intern

3 Months

Kodsoft, Pune

- Developed responsive web applications.
- Worked on frontend, backend development, deployment, and UI/UX improvements.

Industry 4.0 Intern

2 Months

IGNNITTE Centre of Excellence in Skilling and Innovation

- Explored AI, Machine Learning, IoT, automation, and smart technologies.

Certifications

- Data Science & Machine Learning - Adhyayan IT Training and Placement (6 Months)
- C Language - Giri's Tech Hub, Pune (2 Months)
- Java - Elegant IT, Yavatmal (30 Days)
- Power BI - Udemy (17 Hours)

Achievements

- Group leader in C language training.
- Google Coordinator in college tech fest Wings-2025.
- Organized CodeUtsav 1.0, first national-level hackathon at Jagadambha College Of Engineering & Technology.
- Secured 1st position in Prompthon, Generative AI and Prompt Engineering competition at Technovate 2026.

Languages & Soft Skills

Languages: English, Hindi, Marathi

Soft Skills: Communication, Analytical Thinking, Teamwork, Problem Solving, Attention to Detail, Leadership
